# **Utah Department of Workforce Services**

#### September 2002, Volume 12, Number 8

### **Current Indicators**

Utah's unemployment rate for July registered 5.1 percent, continuing a year-long trend of the rate hovering in the low-to-mid 5 percent range. The July number is an increase from June's 4.7 percent, reflecting the persistent difficulty in sustaining employment in the current labor market. There has been a leveling off in the number of persons filing for unemployment insurance over the last several months. Also, we are seeing fewer reports of large layoff activity across the state. The Utah economy is probably nearing its turning point. However, it may take several more months before we see hiring activity improve. Utah's economy can expect a few more bumps along the road to economic recovery.

Approximately 58,900 Utahns were unemployed in July 2002, a 22.9-percent increase from the 47,912 in July 2001, when the unemployment rate was 4.3 percent.

Utah's other primary indicator of current labor market conditions, the year-over change in the number of nonfarm wage and salaried jobs, remains negative but unchanged from the June reading of -1.5 percent. This represents job losses numbering around 17,500.

Nationally, the unemployment rate for July 2002 remained unchanged for the second month in a row at 5.9 percent. The number of persons unemployed was 8.3 million. U.S. nonfarm employment remains in negative territory. For July 2002, year-over, nonfarm employment is down by 1.0 percent. However, the rate of contraction is showing signs of slowing, particularly when compared to the job losses in February and March of 2002 of 1.3 percent.

In Utah, the economy is showing signs that it is approaching its bottom. Overall employment is down 1.6 percent. This matches June's decline, and gives hope

that the downward trend could soon end. The economy will probably stagnate here for several months, meaning a rapid turnaround is not likely.

## Industry-by-Industry

Construction is one weak point. Employing around 68,200 workers, this is 6,400 fewer workers than measured in July 2001. But 2002 was expected to be a weak year in Utah's construction industry, so these numbers live up to that expectation.

Manufacturing is the hardest hit industry with a yearover drop of 6,800 positions. The industry employs around 120,000 Utahns, but this is down from the peak of 135,000 seen in late 1997. Manufacturing has suffered a three-year slump, not only in Utah but nationally as well. This industry is probably at the low point of its slide, but it shows no prospects for a significant turnaround this year.

The industry conglomeration of transportation/communications/utilities (T.C.U.) is sliding into a deeper malaise. Employment levels are down 4.3 percent year-over while just two months ago it was down only 3.5 percent. The communications industry is one of the major factors in this sector's weakness, along with fewer trucking jobs.

The trade industry is stuck in a rut, with several months of employment losses hovering around 5,300 workers. By employing approximately 246,200 workers, it is Utah's second largest employment division. But the effects of an overall weak economy have put enough of a damper on consumer spending to weaken this sec-

tor, particularly in luxury or "high-end" goods. Restaurant employment is also down slightly suggesting consumers may be a bit more frugal in their eating expenditures.

The government sector is helping to add some life to the economy. Employment levels are up by around 3,100 positions. State government employment remained flat. There are slight gains in federal government jobs. Most of the gains occurred in local government.

Utah's largest employment sector is services, employing around 316,900 Utahns. This sector shows year-over growth for July of only 0.6 percent. It's encouraging to have this large sector remain positive, but on the other hand, it is not being the engine of growth it had been throughout most of the past ten years. Computer-related services remain down, but vigorous hiring in personal services, amusement/recreation services, and management services help to counter this.

#### Salt Lake-Ogden MSA

The Salt Lake-Ogden metro area's economy is also suffering employment declines, but it's -1.3 percent contraction is less severe than the statewide -1.6 percent. Salt Lake County is in negative employment territory as is Weber County, but Davis County is still on the positive side. Employment increases at Hill AFB are a key part of Davis County's strength.

## Provo-Orem MSA

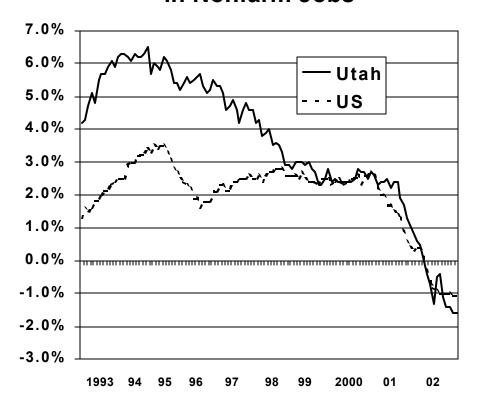

The Provo-Orem area remains weaker than other parts of the state, but the negative numbers are inching upward. Employment decline stands at -1.8 percent, but this is an improvement over the low reached in April of this year at -2.7 percent.

#### **Around Utah**

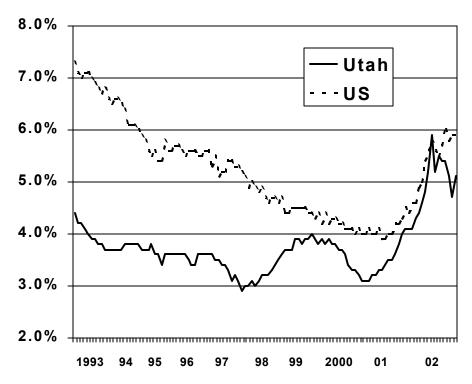

Looking outside the metropolitan corridor, it's largely another picture of weakness. It takes much searching to find counties that are not in employment decline. Davis, Washington, Wasatch, and Carbon counties stand out as lone exceptions.
